## TRILO VCU 200 VERTICUT

The Trilo VCU 200 Verticut unit is specially designed for sports fields, flat areas and parks, and is the solution for all your thatch problems.

- Removes thatch build-up
- Allows increased aeration
- More effective utilization of fertilizer
- Increased water penetration
- Earlier spring green-up

The natural growth rate of grass slows down when a thatch of leaves, old grass clippings, dead roots and moss has built up. It leads to reduced resistance against diseases and therefore increased vulnerability and growth problems.

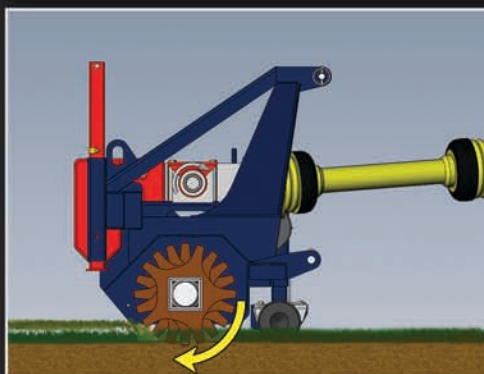

The machine drive is completely mechanical, so that it has no hydraulic hoses and cannot leak. The machine has a working width of 2 metres and is constructed on a single rigid frame. The machine can handle thatch build-ups right down to 40 mm without any problem. The scarifier blades each have 5 teeth, resulting in longer life. As standard, the machine is equipped with 3 mm thick blades with 30 mm spacing. The working depth is adjustable by way of a stepless adjuster on the left and right sides, which move the front roller against the scarifier blades.

### Technical Specifications

- |                    |            |                    |             |
|--------------------|------------|--------------------|-------------|
| • Working width:   | 200 cm     | • PTO:             | 540 rpm/min |
| • Height:          | 77 cm      | • Number blades:   | 65          |
| • Length:          | 66 cm      | • Diameter blades: | Ø 270 mm    |
| • Transport width: | 225 cm     | • Blade thickness: | 3 mm        |
| • Weight:          | 265 kg     | • Blade spacing:   | 30 mm       |
| • Front roller:    | Ø 120 mm   | • Cat:             | I-II        |
| • Working depth:   | max. 40 mm | • Hp requirement:  | 15-20 Hp    |

Options:

- Weight kit with four weights of 22 kg each.
